Applicable Code language (including section numbers): **2009 IRC Chapter 11 Energy Efficiency**

Current Code language: The entirety of Chapter 11 excepting **Section N1101.1 Scope**.

Proposed Code language: **Section 1101.1.1** Buildings shall be designed and constructed in accordance with the International Energy Conservation Code of New Hampshire.

Reason/Justification: Chapter 11 Energy Efficiency of the *2009 IRC* contains minor discrepancies with the previously adopted *2009 IECC*. Substituting the IECC clears up those differences and will make it clear what the requirements for energy efficiency are in the State of New Hampshire. The *2009 IECC* with its versions of those differences was adopted by this board in June 2009.
