EN European Standard

303-5 Heating Boilers – Part 5: Heating Boilers for Solid-Fuels, Manually and Automatically Stoked, Nominal Heat Output of Up to 500 Kw – Terminology, Requirements, Testing and Marking (2012)

Reason / Justification:

While this reference was added by amendment to the 2009 International Mechanical Code, it appears to have been missed in the International Residential Code. It is needed to correspond to the Biomass boiler amendment that references this standard This proposed amendment also updates the reference to the 2012 standard replacing the 1999 standard.

Financial Analysis/Fiscal Impact of proposed amendment:

Clarification only – no fiscal impact.
