Stop Elder Abuse
Keep It On Your Radar Screen

**R - Recognize the Signs of Elder Abuse** - Does the elderly person show evidence of physical abuse, fear, anxiety, a misuse or lack of medications, food, liquids, heat or medical care?

**A - Ask Questions in Private** - Talk with the elderly person alone and in private. An elderly person may be ashamed or too fearful to disclose information in front of family or caregivers.

**D - Document Your Findings** - Write a report and take photographs of any injuries or living conditions that may indicate abuse or neglect.

**A - Assure Access to Safety** - If the elderly person is in danger where they live, take immediate action.* If the concern is less urgent, provide referral information. (See back.)

**R - Review Your Findings and Return** - Follow-up with visits to make sure the situation hasn’t worsened.

* In an emergency/crisis, attempt to convince the person of the need to be seen at a hospital. Alert the first responder and hospital of the conditions and basis for concern.

Under limited circumstances, you may take someone into custody against their will. Refer to:

**NH RSA 135-C:27 Involuntary Emergency Admission,**

or

**NH RSA 172-B:3 Protective Custody.**
