# F635 Best Practices in Community Risk Reduction

**CREF # [2317NFA90](#)**

This two-day course demonstrates to students nationally recognized principles that, when used appropriately, can lead to community risk-reduction programs that can measure success in local communities. This course will give students the opportunity to explore programs from communities across the United States that have been showcased at Vision 20/20 symposiums. These programs demonstrate what nationally recognized organizations identify as examples of “best practices” in community risk reduction.

The target audience for this course may include: Fire and emergency services personnel who help develop and deliver fire prevention and community risk-reduction programs, Fire and emergency services staff with an interest in advancing risk-reduction efforts in their community, Allied health and community service personnel who help develop and deliver risk-reduction programs.
