

STATE OF NEW HAMPSHIRE
2006 HOMELAND SECURITY GRANT PROGRAM
LAW ENFORCEMENT TERRORISM PREVENTION PROGRAM
TARGET CAPABILITIES LIST

May 2006

Target Capabilities for the State of New Hampshire Local LETPP Competitive Grant Applications

Information Gathering and Recognition of Indicators and Warnings:

Information Gathering entails the gathering, consolidation, and retention of raw data from sources including human-source, observation, and open-source. Unlike intelligence collection, Information Gathering is the continual gathering of only pure, unexamined data, not the targeted collection traditionally conducted by the intelligence community or targeted investigations. Recognition of Indicators and Warnings is the ability to see in this gathered data the potential indications and/or warnings of terrorist activities or planning against US citizens, land, infrastructure and/or allies.

Intelligence Analysis and Production:

Intelligence Analysis and Production is the merging of data and information for the purpose of analyzing, linking, and disseminating timely and actionable intelligence with an emphasis on the larger public safety and homeland security threat picture. This process focuses on the consolidation of analytical products among the intelligence analysis units at the Federal, State, Local and Tribal levels for tactical, operational and strategic use. This capability also includes the examination of raw data to identify threat pictures, recognize potentially harmful patterns, or connect suspicious links to discern potential indications or warnings.

Law Enforcement Investigation and Operations:

The broad range of activities undertaken by law enforcement and related entities to detect, examine, probe, investigate and conduct operations related to potential terrorist activities. Current and emerging investigative techniques are used, with emphasis on training, legal frameworks, recognition of indications and warning, source development, interdiction and related issues special to antiterrorism activities.

Critical Infrastructure Protection:

The capability of public and private entities to identify, assess, prioritize, and engage in protecting critical infrastructure and key resources (CI/KR) in order to detect, prevent, deter, degrade and mitigate deliberate efforts to destroy, incapacitate, or exploit the critical infrastructure and key resources.

Critical Resource Logistics and Distribution:

The capability to identify, dispatch, mobilize and demobilize and accurately track and record available human and material critical resources throughout all incident management phases. Critical resources are those necessary for preservation of life, safety, and security. These critical resources should be a) inventoried and tracked, b) available to incident managers and emergency responders upon request for proper distribution and necessary response efforts to aid disaster victims in a cost effective and timely manner, and c) demobilized as necessary.

Citizen Protection: Evacuation and/or In-Place Protection:

The capability to plan for and immediately execute the safe and effective sheltering-in-place of an at-risk population; or an organized and managed evacuation of the at-risk population to areas of safe refuge in response to a potential or actual dangerous environment and the safe and organized re-entry of the population.
