NEWS RELEASE

UPDATED SEABROOK STATION BROCHURES SENT TO COMMUNITIES IN EMERGENCY PLANNING ZONE

CONCORD, N.H. — The 2024 brochure containing emergency information about Seabrook Station has been mailed to communities in the emergency planning zone (EPZ), the 10-mile radius surrounding the plant.

Developed by emergency management officials, the annually updated brochure contains important emergency planning information for residents, businesses and visitors within the EPZ. The brochure details the four emergency classification levels and instructions to be followed in the event one is declared. It lists the ways in which residents, business and visitors may be notified of a potential event at Seabrook Station, and what to do during a shelter-in-place or evacuation. The brochures also include an emergency assistance card, information on potassium iodide (KI) and contact information for communities and the state.

New Hampshire communities within the EPZ include: Brentwood, East Kingston, Exeter, Greenland, Hampton, Hampton Falls, Kensington, Kingston, New Castle, Newfields, Newton, North Hampton, Portsmouth, Rye, Seabrook, South Hampton and Stratham. People that live, work, or vacation within the 10 mile EPZ should be prepared for an emergency at the plant and be familiar with the EPZ's emergency plans and procedures.

Anyone who did not receive a brochure but would like one, can email hsempio@dos.nh.gov.

For more information on Seabrook Station EPZ preparedness information, visit ReadyNH.gov.
