		scores, and share information with oversight committees.				<p>A report of uniform hard skills scores can be exported in the form of NCRC results from ACT. These scores can be filtered by location and specific module ie: Locating Information/Critical Thinking, Applied Math and Reading for Information.</p> <p>It is difficult to compare pre-assessment scores with NCRC scores to ascertain hard skills improvement. The reasons are as follows:</p> <p>The NCRC is timed and the pre-assessment is not. The NCRC has 33-38 questions per section and the Pre-test has only 20 questions per section. In Locating Information, the NCRC exam questions are very different from the Pre-test questions. ACT are working to change this.</p> <p>We propose an export of uniform NCRC scores annually which can be filtered and averaged by location statewide and reported at year end to the oversight committee.</p>
