#	Observation Title	Recommendation	Action Item	Action Due date	Completion Status
1	Technology Planning	Develop policies and procedures ensuring all agencies have a current, complete, and statutorily compliant Agency Information Technology Plan (AITP) Integrate and align AITPs and the Statewide IT plan with the strategic and budgetary initiatives of the customer agencies Develop a more efficient AITP process.	AITPs for FY24/25 are in process and have been using collaboration tools, revised templates and recorded instructions which have greatly improved the process. The states Strategic IT plan was approved by the IT council in 2021. Formal policies and procedures still need to be documented but the processes being used have been socialized, proven to be effective and have been aligned with broader strategic plans.	Ongoing	•••
2	Agreements with State Agencies	Create formal service level agreements (SLA) which specify baseline services and expectations covering all major Department of Information Technology (DoIT) service areas. Ensure staff are accountable for achieving customer service goals and establish metrics and collect data to evaluate performance.	Service catalogs for TSS & OPS Divisions have been updated; plan to post website updates in conjunction with next generation web hosting solution & SharePoint rollout Q1 FY21. Delayed due to COVID priorities. Targeting Q4 FY22 rollout of DoIT website upgrades which will include DoIT services, goals and expectations.	Q4 FY22	••
3	Standardize Use of	Evaluate business needs, identify systems that can best fulfill those needs, and mandate the use of those systems by creating policies and procedures and decommissioning duplicate systems.	Portfolio Oversight Committee created Q1 FY19 with senior staff representing each DoIT Division. In parallel with LBA finding #4, DoIT proposed projects are now being reviewed, scored and prioritized, including internal DoIT systems, to properly align with DoIT plans and business needs. Migration of Change Request and Critical Outage systems to supported solutions have been completed. New Project Management tracking system has been rolled out for major projects. This will be an ongoing initiative as we look to replace legacy systems and processes.	Complete Q3 FY22	••••
4	Needed	Adopt portfolio management practices in prioritizing and managing development projects. Identify which personnel are needed for maintenance software projects and which positions should become shared positions and assigned to projects according to a priority established at the State level.	Base project portfolio management practices and a portfolio repository have been established. Procedures for managing the repository are evolving and are incrementally being defined, reviewed and deployed. Simple procedures have been outlined to prioritize, and assign resources to critical efforts. The initial focus is on DoIT work management. Broader state priorities will evolve and will be dependent on future agency wide executive involvement in order to properly prioritize and focus constrained resources. DoIT Shared resource time tracking has been initiated to gauge existing staffing assignments. Also, PM tools have been implemented to improve management on shared services projects via centralized views and functions. All efforts will continue and will require ongoing refinement.	Complete Q4 FY21	••••

5	Reevaluate Organizational Structure to Improve Customer Service	Evaluate organizational structure with regards to efficiency and effectiveness in providing customer service. Evaluate the feasibility of developing the following: policies and procedures specifying a central service desk as the single point of contact with customers, policies and procedures specifying customer relationship managers and their roles, and a single service desk for technical support requests. The legislature may wish to consider revising RSA 21-R to allow DoIT management greater flexibility to reorganize their department to maximize efficiency and effectiveness.	Project Management Office created in Q4FY19 (3 positions defined) Enterprise Architecture Committee established in Q1FY20. Merged Helpdesk and Desktop Services under single manager to better leverage skills and improve ticket closure times During 2nd half of FY21, reviewed vacant positions across divisions. Several positions reallocated to new skills/roles/divisions required based on DoIT Enterprise portfolio in alignment with Statewide IT Strategic Plan. Review of vacant positions will be an ongoing effort with Division Directors and CIO Office.	Complete Q4 FY21	••••
6	Improve IT Project Management	Improve project management by: ensuring project leaders follow DoIT's system development methodology, ensuring project management principles are followed, effectively monitoring the timeline and budgetary benchmarks of development projects, and developing and implementing policies and procedures to retain all project documents in an accessible location.	Project management guidelines have been outlined. A PMO portal has been developed with video instructions and various project management templates have been established to promote consistency. These templates include a standard M365 TEAMS template, as well as various documents to assist with agile requirements development and standard processes to request and track projects. Many aspects of the M365 platform are being used and promoted to enahnce project management capabilities. Also, a portfolio oversight committee meets weekly to review new project efforts and to set direction accordingly. Ongoing efforts continue to evaluate and incorporate standard tools that will assist DoIT and agencies to better manage and track projects. DoIT is currently working on a tool implementation that will expand portfolio tracking, dashboard reporting and basic resource tracking that is targeted for initial pilot deployment in mid 2022.	Ongoing	
7	Evaluate Human Resource Allocations	Improve human resource distribution by: evaluating use of direct and shared funded employees and make changes to improve efficiency, curtailing technical support work done by non-technical support staff through training and policies, and evaluating current workload for IT Leads. Additionally, communicate statutory authority over all its staff to customer agencies, and collaborate with these agencies to more efficiently allocate human resources.	For FY20/21, several positions have been reclassed and/or shifted to different divisions to address new skill sets & roles, aligned with the Organization realignment plans (item #5). • Reviewing Agency Apps Portfolios and Skills needs for talent management strategy - Complete (See item #5)	Complete Q1 FY22	••••
8	Improve Regional Support Services Operations	Evaluate Regional Support Services (RSS) ticket workload and use of remote technical support tools to improve efficiency. Evaluate the current RSS organizational structure for efficiency and make changes accordingly.	New Remote Support tools were implemented Q1 FY19 to better leverage staff. Complete. Ongoing - Ticketing metrics will be reviewed to re-align staffing assignments as needed.	COMPLETE Q1 FY19	••••

Ş	Capture and Review Availability Metrics	Evaluate whether existing help desk software, FootPrints®, can effectively provide the functions of the DoIT Tech Center software so accurate reports can be generated regarding system availability for improved management oversight. If FootPrints is incapable of supporting and reporting on system availability metrics, evaluate the best way to gather and accurately report this data.	Complete migration of Critical Outages to Footprints and Change Requests to web based solution - Q4 FY19 Evaluating Enterprise Service Management solutions to provide additional capabilities (Asset Mgmt., Requests, Metrics, Dashboards) for eventual replacement of current tools in FY22/23 Developing metrics for Critical Outages by Type and Agency Delayed due to COVID priorities. Tageting Q1-Q2 of FY23	Ongoing	••
1) Improve Source Code Management Practices and Systems	Develop a process to identify State-developed software application assets and require storage in a single source code management tool, monitor compliance with policy, and complete efforts to automate source code management processes.	The Source Code Mangement policy, while still in effect is undergoing revision in light of current efforts to provide additional options for SCM. DoIT is reviewing options for cloud-based repositories that allow for more current coding languages to be utilized. This is an enterprise related effort that continues. While Harvest remain in place and will be for the foreseeable future, especially for legacy based projects/assets, we are moving closer towards several pieces that will comprise a larger mult-tool solution. Currently we are examining the platform of (MS) DevOps and piloting supporting tools.	Ongoing	••
1	Ensure State Websites are Uniform	Collaborate with other agencies ensuring all State websites follow DoIT's e-Government Branding Policy. Additionally, evaluate how efficiently web services are delivered to agencies and make changes as necessary.	Enterprise content management system and hosting solution are operational and a professional services contract is in place to work with agencies on content strategy and implementation. New websites will adhere to new standards and existing websites are being upgraded.	COMPLETE Q3 FY20	••••
1.	2 Improve Performance Measurement	Improve performance measurement efforts by creating a formal, systematic approach to measure customer satisfaction for all major DoIT services and address problems customer agencies are having with DoIT services.	The 2018 annual DoIT survey was expanded to include evaluation of all major DoIT services, by agency. Response rate was almost 30%, covering all executive branch agencies. Results have been compiled and reviewed with partner agencies, with follow up actions identified for key areas. 2019 annual survey distributed in Feb 2020.	COMPLETE Q1 FY20	••••
1	S Simplify Cost Allocation Methodologies	Simplify cost allocation methodologies by balancing the goal of being precise against the need to be transparent and efficient.	Phase 1 - All allocations have been reviewed and updated as needed in preparation for FY20/21 budget submission. Phase 2 - Perform allocation reviews in preparation for FY22/FY23 budget. DoIT will continue to review various cost allocation methods to identify opportunities to simplify the billing process.	COMPLETE Q1 FY21	••••

14	Process	Improve the effectiveness and efficiency of the billing process by: ensuring all manual entries receive a secondary review, implementing a periodic internal review of invoices, developing policies and procedures to assist agencies on DoIT invoices, reviewing the data collection frequency schedules, assessing the necessity to solicit a computer count verification for 25 different State agencies, and consolidating the data integrity and formatting queries.	Phase 1 - Two A3 lean events completed. DoIT continues to implement effective internal controls. COMPLETE Phase 2 - DoIT is working to establishing procedures for auditing the amount allocated to each agency within the invoicing process. COMPLETE Phase 3 - Review options for allocation/invoice/reporting software - nearing end of life; need funding in FY22-FY23 for replacement solution. Due to budget constraints, DoIT was unable to add additional resources to update the cost allocation software. We will continue to pursue additional options and funding during the next biennium. Ongoing	COMPLETE Q1 FY21	••••
15		Ensure customer agency funding methods are formalized and kept current.	Agencies previously supported via General Funds were reviewed during the FY20/21 Budget process. DoIT met with the Governor's budget director to confirm general funds will be transferred back to the agencies in the FY20/21 budget.	COMPLETE Q1 FY19	••••
16		Comply with statute and ensure the cost allocation plan reflects current allocation practices and periodically review and revise cost allocation plan to ensure accurate information is provided to those responsible for oversight.	All allocations are being reviewed and updated as needed in preparation for FY20/21 budget submission. Met with DAS to review and finalize the cost allocation plan for FY20/21.	COMPLETE Q3 FY19	••••
17	Evaluate Financial Systems and Analyze Business Processes	Analyze use of duplicate financial software applications and inefficient business processes. Any future efforts to revise internal software applications should include an assessment of business processes and requirements.	Phase 1 - Two A3 lean events have been completed. Phase 2 - Based upon analysis of business requirements and stakeholder feedback, DoIT moved forward with key enhancements to the R&R system to streamline the input process and budget status reporting. COMPLETED	COMPLETE Q3 FY19	••••
