Read it carefully before you invest or send money.
Trustee’s Message to Participants

Dear Investor:

On behalf of the State of New Hampshire, I am pleased to provide you with your UNIQUE College Investing Plan annual report.

Since its inception in July 1998, the UNIQUE Plan has had tremendous growth and this year is no exception. In fact, as of September 30, 2003, the UNIQUE College Investing Plan had more than 200,000 accounts and $1.8 billion in assets.

This annual report is important because it gives you, the Participant, the opportunity to review the UNIQUE College Investing Plan in depth. You can see how the different Portfolios have performed over time and you can also take a close look at the Portfolio’s holdings and investment strategies. I also hope you will take the time to read the Manager’s Overview, a discussion with Ren Cheng, the Portfolio Manager of the UNIQUE College Investing Plan. This is your chance to hear — right from the source — information specific to the performance of the Portfolios over the past 12 months, the market and investing environment, and his outlook for the months ahead.

We are pleased to report that over this last year the UNIQUE College Investing Plan has made several enhancements:

- Thanks to your feedback, we have reduced the volume of account statements mailed to you and offered online account opening.
- You can use the redesigned College Planner tool at www.fidelity.com/unique to gauge your progress against your college savings goal.
- A special credit card is now offered that allows you to earn dollars toward your UNIQUE College Investing Plan account.

We are continuously striving to improve the UNIQUE College Investing Plan and the above list is just a few of the many enhancements we brought you over the last year. You may have heard news stories that have been critical of the mutual fund industry as of late. Both myself and the State’s College Tuition Savings Plan Advisory Commission are working closely with Fidelity to monitor the evolving regulatory environment. The Advisory Commission and I support the mutual fund industry’s efforts to protect the interests of all shareholders through thoughtful changes in industry practices and improved regulation. I would like to direct your attention to the message following this letter from Mr. Edward C. Johnson, Chairman of Fidelity Investments, on where Fidelity stands on this issue. In closing, I applaud your participation in the UNIQUE Plan and your efforts to help secure the educational futures of our children.

Sincerely,

Michael Ablowich
State Treasurer
State of New Hampshire
Chairman’s Message

Dear Investor:

Many of you have read or heard news stories recently that were critical of mutual funds and made allegations that the mutual fund industry has been less than forthright. I find these reports unsettling and not necessarily an accurate picture of the overall industry, and I would like you to know where we at Fidelity stand.

With specific regard to allegations that certain mutual fund companies were violating the Securities and Exchange Commission’s forward pricing rules or were involved in so-called “market timing” activities, I want to say two things:

First, Fidelity does not have agreements that permit customers who buy fund shares after 4 p.m. to obtain the 4 p.m. price. This is not to say that someone could not deceive the company through fraudulent acts. But I underscore that we have no so-called “agreements” which would permit this illegal practice.

Second, Fidelity has been on record for years opposing predatory short-term trading which adversely affects other shareholders in a mutual fund. In fact, in the 1980s, we began charging a fee — which is returned to the fund and, therefore, to investors — to discourage this activity. What’s more, several years ago we took the industry lead in developing a Fair Value Pricing Policy to prevent market timing on foreign securities in our funds. It is reasonable to assume that another structure can be developed that would alter the system to make it much more difficult for predatory traders to operate. This, however, will only be achieved through close cooperation among regulators, legislators and the industry.

Certainly no industry is perfect, and there have been instances of unethical and illegal activity from time to time within the mutual fund industry. When this occurs, confessed or convicted offenders should be dealt with appropriately. Clearly, every system can be improved. We applaud well thought out improvements by regulators, legislators and industry representatives that achieve the common goal of building and protecting the value of investors’ holdings. But we remain concerned about the risk of over-regulation and the quick application of simplistic solutions to intricate problems.

For more than 57 years, Fidelity Investments has worked very hard to improve its products and service to justify your trust. When our family founded this company in 1946, we had only a few hundred customers. Many of them were family and friends. Today, we serve more than 18 million customers including individual investors and participants in retirement plans across America.

Let me close by saying that we do not take your trust in us for granted, and we realize that we must always work to improve all aspects of our service to you. In turn, we urge you to continue your active participation with your financial matters, so that your interests can be well served.

Best regards,

Edward C. Johnson 3d

Edward C. Johnson 3d
UNIQUE College Portfolio
Performance: The Bottom Line

Performance
There are several ways to evaluate a portfolio’s historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical $10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns

<table>
<thead>
<tr>
<th>Periods ended September 30, 2003</th>
<th>Past 1 year</th>
<th>Past 5 years</th>
<th>Life of Portfolio</th>
</tr>
</thead>
<tbody>
<tr>
<td>UNIQUE College Portfolio</td>

</tbody>
</table>

Cumulative total returns show the portfolio’s performance in percentage terms over a set period of time — in this case, one year or since the Portfolio started on July 1, 1998. For example, if you had invested $1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be $1,050. You can compare the Portfolio’s returns to the performance of the UNIQUE College Portfolio Composite Index, an approximate weighted combination of the following unmanaged indices: the Lehman Brothers Intermediate Government/Credit Bond Index (40.00%), the Lehman Brothers 3-month U.S. Treasury Bill Index (40.00%), and the Wilshire 5000 Total Market Index (20.00%). The index weightings are adjusted periodically to reflect the Portfolio’s changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the one year and five year time periods ending September 30, 2003 and for the period from July 1, 1998 to September 30, 2003.

Average annual total returns take the Portfolio’s cumulative return and show what would have happened if the Portfolio had performed at a constant rate each year.

$10,000 Over Life of Portfolio

Life of Portfolio: Let’s say hypothetically that $10,000 was invested in UNIQUE College Portfolio on July 1, 1998, when the Portfolio started. As the chart shows, by September 30, 2003, the value of the investment would have grown to $12,810 — a 28.10% increase on the initial investment. For comparison, look at how the UNIQUE College Portfolio Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same $10,000 would have grown to $12,605 — a 26.05% increase.

Understanding Performance

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market’s ups and downs, you may have a gain.

Average annual total returns take the Portfolio’s cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

Life of Portfolio: Let’s say hypothetically that $10,000 was invested in UNIQUE Portfolio 2009 on July 1, 1998. When the Portfolio started. As the chart shows, by September 30, 2003, the value of the investment would have been $11,710 — a 17.10% increase on the initial investment. For comparison, look at how the UNIQUE Portfolio 2009 Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same $10,000 would have been $11,253 — a 12.53% increase.

Understanding Performance
How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. It is a common mistake to judge portfolio performance based on short-term gains or losses. The market can be volatile, and deciding where to place your investments must involve a variety of factors. A professional investment advisor can help you to understand your own investment goals, risk tolerance and investment horizon. Ultimately it will be up to you to decide how to allocate your investments. It is important to remember that past performance is not necessarily indicative of future results.
Performance

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical $10,000 investment. Total return reflects the change in the value of an investment.

Average annual total returns take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

Life of Portfolio: Let's say hypothetically that $10,000 was invested in UNIQUE Portfolio 2012 on July 1, 1998, when the Portfolio started. As the chart shows, by September 30, 2003, the value of the investment would have been $11,320 — a 13.20% increase on the initial investment. For comparison, look at how the UNIQUE Portfolio 2012 Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same $10,000 would have been $10,724 — an 7.24% increase.

Understanding Performance

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market’s ups and downs, you may have a gain.
UNIQUE Portfolio 2015
Performance: The Bottom Line

Performance
There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical $10,000 investment. Total return reflects the change in the value of an investment.

Cumulative total returns show the portfolio's performance in percentage terms over a set period of time — in this case, one year or since the Portfolio started on July 1, 1998. For example, if you had invested $1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be $1,050. You can compare the Portfolio's returns to the performance of the UNIQUE Portfolio 2015 Composite Index, an approximate weighted combination of the following unmanaged indices: the Lehman Brothers Intermediate Government/Credit Bond Index (7.47%), the Merrill Lynch High Yield Master II Index (9.81%), the Morgan Stanley Capital International Europe, Australasia, Far East Index (9.42%), and the Wilshire 5000 Total Market Index (73.30%). The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the one year and five year periods ending September 30, 2003 and for the period from July 1, 1998 to September 30, 2003.

### Understanding Performance

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.
Q. How did the UNIQUE Plan Portfolios perform during the past year, Ren?
A. During the 12 months ending September 30, 2003, the UNIQUE College Investing Plan’s age-based Portfolios performed as we intended, meaning their absolute returns mirrored a scale of performance that might be expected from a series of Portfolios with different age-appropriate, asset allocation risk levels. Additionally, the Portfolios generally performed in line with their benchmarks. (For specific performance results on the age-based Portfolios and the static allocation Portfolios available in the UNIQUE Plan, please see the performance section of this report in the pages preceding this interview.)

Q. What factors shaped the investment environment?
A. Volatility, volatility, volatility. That was the main factor. Let’s take a look at the domestic equity market, for example. During the first half of the one-year period, the Standard & Poor’s 500SM Index — a popular benchmark of U.S. stock market performance — fell to a low point of 776 in early October 2002, then rallied sharply above the 900 mark during the fourth quarter of 2002 before tumbling back to 800 prior to the Iraqi war in March 2003. At this reference point, stock valuations were extremely low because investors were dealing with the uncertainty of the war. Therefore, many investors preferred money market and bond investments, given their lower risk profiles relative to equities. When it became clear that the war’s major hostilities would end quickly, investors grew optimistic about the domestic economy, as well as overseas markets, and began investing in beaten-down stocks in several cyclical areas — such as technology, industrials and materials — that typically outperform the broader market during a period of economic expansion. For the remainder of the period, companies in many industries reported solid earnings growth and investors continued to add stocks to their Portfolios, which pushed share prices higher. As a result, the equity markets rebounded strongly during the second half of the period and the S&P 500® index stood at nearly 1,000 at the end of September. In contrast, the investment-grade bond market, which had been the top-performing asset class earlier in the period, suffered a sell-off due to the improving economic climate and higher interest rates.

Q. What impact did the markets’ volatility have on the performance of the UNIQUE Plan Portfolios?
A. For most investors — even professionals — it’s nearly impossible to successfully predict the direction of the markets. Therefore, the most effective way for most people to reach their long-term goals is by being diversified through an age-appropriate allocation to multiple asset classes. Six months ago, the age-based Portfolios’ exposure to strong-performing investment-grade bonds helped offset the significant weakness the Portfolios experienced through their equity exposure. In April 2003, however, the equity markets took off. Had the age-based UNIQUE Plan Portfolios not been exposed to equities at this time, shareholders would have missed out on the ferocious two-month rally that ensued, one in which the Wilshire 5000® Total Market Index leaped 14.8% and the Morgan Stanley Capital InternationalSM Europe, Far East (MSCI® EAFE®) Index jumped 16.7%. Maintaining a diversified portfolio with an age-appropriate allocation is a form of risk control that should enable the beneficiaries of the UNIQUE Plan’s shareholders to participate in the dramatic rally of any one particular asset class — and with less risk than having all of one’s eggs in one basket. Keeping an eye on risk is extremely important, particularly when a loved one’s higher education is at stake.

Q. What investments performed well?
A. All of the underlying equity funds of the UNIQUE Plan’s age-based Portfolios had double-digit returns during the past year. Those that emphasized more-aggressive stocks in the technology, biotechnology and brokerage groups, such as Fidelity Growth Company, tended to outperform those managed with a stricter valuation discipline. Investors had a greater appetite for adding more risk to their investments in recent months, and that also helped stocks of smaller companies generally outperform those of larger, more-established ones. Fidelity OTC Portfolio — an underlying fund — was a beneficiary of this trend, as it handily outperformed the Wilshire 5000® Index. Meanwhile, foreign stocks performed slightly better than domestic stocks during the period, so it was quite helpful that most of the Portfolios had some exposure to this group. Even better, both of the underlying international funds outperformed the MSCI EAFE Index. Adept security selection in Japan was a significant contributor to the solid results of both Fidelity Overseas and Fidelity Diversified International.

Q. How did the UNIQUE Plan’s high-yield exposure play out?
A. Quite well. The high-yield holdings in the age-based Portfolios and the 70% Equity Portfolio generally outperformed the Merrill Lynch® U.S. High Yield Master II Index. Strong security selection was the key factor in the solid return of Fidelity Capital & Income Fund, which appreciated more than 47%. The fund’s holdings in the previously beaten-down telecommunications, electric utility and energy sectors rebounded strongly due to their improving financial profiles. Meanwhile, Fidelity High Income gained almost 20%, a return that was roughly in line with the high-yield benchmark.

Q. What hurt the Portfolios’ performance?
A. Most of the Portfolios gave back some performance relative to their benchmarks due to their holdings in a handful of underlying equity funds — including Fidelity Growth & Income, Fidelity Fund, and Disciplined Equity — that were managed more conservatively through a strong emphasis on stocks with low or reasonable valuations. These funds generally lagged the broader market due to their underexposure to sectors that returned to favor, such as technology and biotechnology. Elsewhere, an abrupt change in the market’s expectations about the economy, inflation and interest rates contributed to a volatile period for investment-grade bonds. As the period progressed and it became more evident that
the economy was improving, the probability that the Federal Reserve Board would raise interest rates increased, causing a sell-off in fixed-income securities. As a result, the UNIQUE Plan’s underlying investment-grade bond funds had only modest returns. In particular, Fidelity Government Income, which trailed the Lehman Brothers® Aggregate Bond Index, suffered from owning a high percentage of relatively poor-performing Treasury bonds, a group that experienced its worst month in more than 20 years during July. Overall, the UNIQUE Plan’s investment-grade bond holdings collectively lagged the return of the Lehman Brothers Intermediate Government/Credit Bond Index.

Q. Any final thoughts, Ren?

A. During the past year, the reversal of the equity market was so quick and strong that the valuations of many stocks were stretched once again by period end. With the equity market’s volatility being as extreme as it’s ever been, I believe it’s important to maintain an age-appropriate mix of investments in multiple asset classes. We’ll gradually reallocate the target investment mixes of the age-based Portfolios during the coming months. The table below illustrates the target mix we’d like to achieve for each Portfolio on March 31, 2004.

Ren Cheng elaborates on the benefits of the structured investment approach used to manage the age-based Portfolios in the UNIQUE Plan:

“A common investing tenet is that corporate earnings drive stock prices. Over the long term, that belief generally has been accurate. History has shown that those companies with solid and consistent track records of earnings growth also have experienced strong appreciation in their stock prices over time. However, good business fundamentals alone are no guarantee of stock appreciation within a short period of time. Stock performance may reflect a company’s fundamentals to a point in the short term, but quick and decisive stock movements typically are affected by both fundamentals and short-term market psychology — or human emotion — the latter of which may or may not be rational. For example, Company XYZ’s quarterly stock performance can be driven by the market’s perception of its recent results, or expectations of its future results. Many companies deliver strong quarterly profit growth but their stocks go nowhere. This can occur for many reasons. The market may believe, for example, that Company XYZ’s results in the prior quarter were solid, but its future outlook looks less promising, so the stock’s price falls.

“Correctly identifying the market’s perceptions of a company is a daunting task for any investor. The structured investment approach of the UNIQUE Plan was created to simplify the investment process and strip away the human emotion that often comes with investing. The asset allocations of the UNIQUE Plan’s age-based Portfolios roll down over time according to a specified target, meaning they will gradually become more conservative as the plan beneficiaries near their expected education enrollment dates. This roll-down is a form of risk control that helps keep the Portfolios from falling victim to the severe short-term weakness of any one particular asset class. The asset-allocation mixes — and the rate at which they ‘age’ with their beneficiaries — were developed over a two-year period of in-depth research on the historical performance of all the asset classes. This research has been the foundation of the UNIQUE Plan investment structure, which I believe is the best way to enable investors to meet the college savings goals of their intended beneficiaries.”

Portfolio Facts

Goal: All of the age-based Portfolios seek capital appreciation with reasonable safety of principal, consistent with the ages of the beneficiaries for whom they are designed. There are three static allocation Portfolios. The investment objective of 100% Equity Portfolio is growth of capital over the long term. The investment objective of 70% Equity Portfolio is to maximize total return over the long term by allocating assets among stock and bond mutual funds. The investment objective of Conservative Portfolio is preservation of capital by allocating its assets among bond and money market funds. Income is a secondary objective.

Start date: July 1, 1998; except 2018, which started on January 4, 1999; 70% Equity Portfolio, which started on May 10, 2001; 100% Equity Portfolio, which started on May 7, 2001; 2021 and Conservative Portfolio, both of which started on December 13, 2001

Size: as of September 30, 2003, more than $42 million (College); $126 million (2003); $227 million (2006); $267 million (2009); $271 million (2012); $295 million (2015); $272 million (2018); $54 million (2021); $77 million (70% Equity); $120 million (100% Equity); $51 million (Conservative)

Manager: Ren Cheng, since inception; manager, Fidelity Freedom Funds, since 1996; various structured investments for Fidelity Management Trust Company; joined Fidelity in 1994

Notes to Financial Statements
For the year ended September 30, 2003

The New Hampshire Higher Education Savings Plan Trust (the Trust) was established to promote and operate a higher education savings program under section 529 of the Internal Revenue Code of 1986, as amended. The Treasurer of the State of New Hampshire (State of New Hampshire) is the Trustee of the Trust. The Trust includes thirty-two investment Portfolios (the "Portfolios") as of September 30, 2003, eleven of which are offered under the name of the UNIQUE College Investing Plan (the "Plan"). These financial statements report on the Portfolios of the Plan, nine of which invest in equity, fixed-income, and/or money market funds, one of which invests in fixed-income and money market funds and one of which invests entirely in equity funds. The equity, fixed-income, and money market funds, collectively referred to as the Underlying Funds, are managed by Fidelity Management & Research Company (FMR). The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America which require management to make certain estimates and assumptions at the date of the financial statements.

The following summarizes the significant accounting policies of the Portfolios:

Securities Valuation. Net asset value per unit is calculated as of the close of business of the New York Stock Exchange, normally 4:00 p.m. Eastern time. Investments in the Underlying Funds are valued at the closing net asset value per share of each Underlying Fund on the day of valuation.

Investment Income. Income and capital gain distributions from the Underlying Funds, if any, are recorded on the ex-dividend date.

Expenses. Most expenses of the Trust can be directly attributed to a Portfolio. Expenses included in the accompanying financial statements reflect the expenses of each Portfolio and do not include any expenses associated with the Underlying Funds.

Security Transactions. Security transactions, normally shares of the Underlying Funds, are accounted for as of trade date. Gains and losses on securities sold are determined on the basis of average cost.

Units. The beneficial interest of each participant and beneficiary in the net assets of the Portfolios is represented by units. Contributions to and redemptions from the Portfolios are subject to terms and limitations defined in the Participation Agreement between the participant and the Trust. Contributions and redemptions are recorded upon receipt of participant's instructions in good order, based on the next determined net asset value per unit (unit value). Unit values for each Portfolio are determined daily. There are no distributions of net investment gains or net investment income to the Portfolios' participants or beneficiaries.

2. Fees.
The State of New Hampshire has entered into a Management and Administrative Services agreement with FMR Corp. (the parent company of the group of companies commonly known as Fidelity Investments), Strategic Advisers, Inc. (Strategic) and Fidelity Brokerage Services, LLC (together Fidelity) to provide administrative, record keeping, marketing, and investment management services to the Trust.

According to this agreement and a related investment advisory agreement with Strategic, an investment adviser registered under the Investment Advisers Act of 1940, Fidelity receives a fee computed daily at an annual rate of .15% of net assets of the Portfolios. This fee is paid from a fee imposed by the State of New Hampshire equal to .30% annually of each Portfolio's net assets.

The remaining .15% is retained by the State of New Hampshire. In addition, each UNIQUE College Investing Plan account is charged a $30 annual fee, which is waived under certain circumstances. Any annual fees imposed by the State of New Hampshire are in turn paid to Fidelity. Annual fees charged during the year are included in cost of units redeemed and fees on the Statement of Changes in Net Assets.
Report of Independent Auditors

To the Fiscal Committee of the General Court of the State of New Hampshire, the Trustee of the New Hampshire Higher Education Savings Plan Trust and the Participants of The UNIQUE College Investing Plan:

In our opinion, the accompanying statements of assets and liabilities, including the schedules of portfolio investments as of September 30, 2003, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of the New Hampshire Higher Education Savings Plan Trust: UNIQUE College Portfolio, UNIQUE Portfolio 2003, UNIQUE Portfolio 2006, UNIQUE Portfolio 2009, UNIQUE Portfolio 2012, UNIQUE Portfolio 2015, UNIQUE Portfolio 2018, UNIQUE Portfolio 2021, UNIQUE Conservative Portfolio, UNIQUE 70% Equity Portfolio, and UNIQUE 100% Equity Portfolio (collectively the “Portfolios”) at September 30, 2003, and the results of each of their operations, the changes in each of their net assets and each of the financial highlights for the periods indicated, in conformity with accounting principles generally accepted in the United States of America. The financial statements and financial highlights (hereafter referred to as “financial statements”) are the responsibility Portfolios’ management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with auditing standards generally accepted in the United States of America which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimate made by management, and evaluating the overall financial statement presentation. We believe that our audits, which include confirmation of securities at September 30, 2003, by correspondence with the transfer agent, provide a reasonable basis for our opinion.
