Read it carefully before you invest or send money.

### Trustee's Message to Participants

#### **Dear Participant:**

On behalf of the State of New Hampshire and the New Hampshire College Tuition Savings Plan Advisory Commission (Advisory Commission), I am pleased to provide you with your UNIQUE College Investing Plan (UNIQUE Plan) Annual Report as of September 30, 2006.

Since its inception in July 1998, the UNIQUE Plan has had tremendous growth and this year is no exception. In fact, as of September 30, 2006, the UNIQUE Plan has more than 316,000 accounts and nearly \$4.2 billion in assets.

The Annual Report is designed to provide UNIQUE Plan investors with an opportunity to review the UNIQUE College Investing Plan in-depth, including highlights of how the different portfolios have performed over time and a close look at the portfolio's holdings and investment strategies. The Manager's Overview, a discussion with UNIQUE Plan Portfolio Managers, Jonathan Shelon and Christopher Sharpe, provides participants with specific information on the portfolios over the past 12 months, the market and investing environment, and an outlook for the months ahead.

We are also excited to report that we recently made several enhancements to the UNIQUE College Investing Plan:

- Added additional low-cost investment options, which include portfolios that invest in index funds and are priced among the lowest in the industry at 0.50%.
- Eliminated the annual \$20 account maintenance fee.
- Lowered the minimum to open an account to \$50 or \$15 with automatic investments.

As you may have read, the Pension Protection Act of 2006 was signed into law containing a provision to make permanent the tax-free treatment of qualifying 529 plan distributions. The passage of this significant law will now provide families saving in the UNIQUE Plan with certainty that future qualified withdrawals will be federal income tax-free.

Saving for college is one of the biggest challenges that many of us will face as we prepare our children for their future. As Trustee of the UNIQUE Plan, I assure you that the Advisory Commission and I will continue to work with Fidelity Investments to ensure that the Plan is among the best available to you. We will continue to monitor issues in the mutual fund industry and, where appropriate, advocate for changes to industry practices and regulations.

Thank you for choosing the UNIQUE College Investing Plan. We look forward to serving your needs for years to come.

Sincerely,

Michael A. Ablowich State Treasurer

State of New Hampshire

#### **Performance**

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

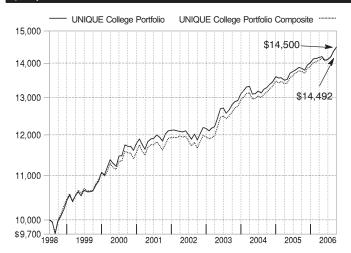

<b>Cumulative Total Returns</b>			
Periods ended September 30, 2006	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE College Portfolio	4.69%	22.47%	45.00%
UNIQUE College Portfolio Composite	5.32%	24.73%	44.92%
LB Int Govt/Credit Bond	3.55%	23.64%	55.74%
LB 3 Month US T-Bill	4.52%	12.03%	32.85%
Dow Jones Wilshire 5000 Composite	10.38%	51.27%	39.48%

**Cumulative total returns** show the portfolio's performance in percentage terms over a set period of time — in this case, one year or since the Portfolio started on July 1, 1998. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE College Portfolio Composite Index, an approximate weighted combination of the following unmanaged indices: the Lehman Brothers Intermediate Government/Credit Bond Index, the Lehman Brothers 3-Month U.S. Treasury Bill Index, and the Dow Jones Wilshire 5000 Composite Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the one year and five year time periods ending September 30, 2006 and for the period from July 1, 1998 to September 30, 2006.

Average Annual Total Returns			
Periods ended September 30, 2006	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE College Portfolio	4.69%	4.14%	4.60%
UNIQUE College Portfolio Composite	5.32%	4.52%	4.60%
LB Int Govt/Credit Bond	3.55%	4.34%	5.51%
LB 3 Month US T-Bill	4.52%	2.30%	3.50%
Dow Jones Wilshire 5000 Composite	10.38%	8.63%	4.11%

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

#### \$10,000 Over Life of Portfolio

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE College Portfolio on July 1, 1998, when the Portfolio started. As the chart shows, by September 30, 2006, the value of the investment would have been \$14,500 — a 45.00% increase on the initial investment. For comparison, look at how the UNIQUE College Portfolio Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$14,492 — a 44.92% increase.

### **Understanding Performance**

#### **Performance**

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

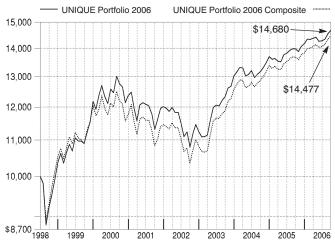

Cumulative Total Returns			
Periods ended September 30, 2006	Past 1 year	Past 5 years	Life of Portfolio

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE Portfolio 2018 on January 4, 1999, when the Portfolio started. As the chart shows, by September 30, 2006 the value of the investment would have been \$13,660 — a 36.60% increase on the initial investment. For comparison, look at how the UNIQUE Portfolio 2018 Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10.000 would have been \$13,438 — a 34.38% increase.

### **Understanding Performance**

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

Annual Report

#### \$10,000 Over Life of Portfolio

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE Portfolio 2021 on December 13, 2001, when the Portfolio started. As the chart shows, by September 30, 2006, the value of the investment would have been \$13,280 — a 32.80% increase on the initial investment. For comparison, look at how the UNIQUE Portfolio 2021 Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$14.346 — a 43.46% increase.

### **Understanding Performance**

#### **Performance**

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

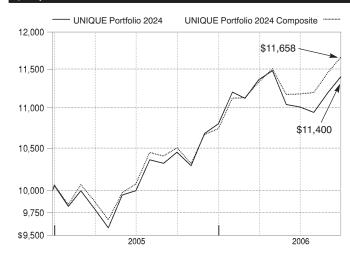

Cumulative Total Returns		
Periods ended September 30, 2006	Past 1 year	Life of Portfolio
UNIQUE Portfolio 2024	9.09%	14.00%
UNIQUE Portfolio 2024 Composite	10.98%	16.58%
LB Int Govt/Credit Bond	3.55%	4.82%
ML U.S. High Yield Master II Constrained	7.22%	9.50%
MSCI EAFE	19.34%	30.95%
Dow Jones Wilshire 5000 Composite	10.38%	15.77%

**Cumulative total returns** show the portfolio's performance in percentage terms over a set period of time — in this case, since the Portfolio started on December 27, 2004. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE Portfolio 2024 Composite Index, an approximate weighted combination of the following unmanaged indices: the Lehman Brothers Intermediate Government/Credit Bond Index, the Merrill Lynch U.S. High Yield Master II Constrained Index, the Morgan Stanley Capital International Europe, Australasia, Far East Index, and the Dow Jones Wilshire 5000 Composite Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the year ended September 30, 2006 and for the period from December 27, 2004 to September 30, 2006.

Average Annual Total Returns		
Periods ended September 30, 2006	Past 1 year	Life of Portfolio
UNIQUE Portfolio 2024	9.09%	7.73%
UNIQUE Portfolio 2024 Composite	10.98%	9.11%
LB Int Govt/Credit Bond	3.55%	2.71%
ML U.S. High Yield Master II Constrained	7.22%	5.29%
MSCI EAFE	19.34%	16.57%
Dow Jones Wilshire 5000 Composite	10.38%	8.68%

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

#### \$10,000 Over Life of Portfolio

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE Portfolio 2024 on December 27, 2004, when the Portfolio started. As the chart shows, by September 30, 2006, the value of the investment would have been \$11,400 — a 14.00% increase on the initial investment. For comparison, look at how the UNIQUE Portfolio 2024 Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$11.658 — a 16.58% increase.

### **Understanding Performance**

#### **Performance**

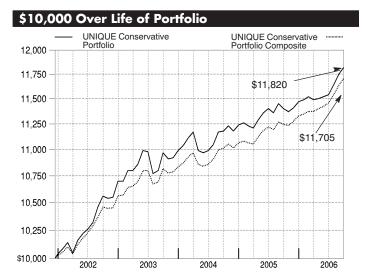

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns		
Periods ended September 30, 2006	Past 1 year	Life of Portfolio
UNIQUE Conservative Portfolio	3.68%	18.20%
UNIQUE Conservative Portfolio Composite	4.09%	17.05%
LB Int Govt/Credit Bond	3.55%	24.12%
LB 3 Month US T-Bill	4.52%	11.41%

Cumulative total returns show the portfolio's performance in percentage terms over a set period of time — in this case, since the Portfolio started on December 13, 2001. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE Conservative Portfolio Composite Index, an approximate weighted combination of the following unmanaged indices: the Lehman Brothers Intermediate Government/Credit Bond Index and the Lehman Brothers 3-Month U.S. Treasury Bill Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the year ended September 30, 2006 and for the period from December 13, 2001 to September 30, 2006.

Average Annual Total Returns		
Periods ended September 30, 2006	Past 1 year	Life of Portfolio
UNIQUE Conservative Portfolio	3.68%	3.54%
UNIQUE Conservative Portfolio Composite	4.09%	3.33%
LB Int Govt/Credit Bond	3.55%	4.61%
LB 3 Month US T-Bill	4.52%	2.28%

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE Conservative Portfolio on December 13, 2001, when the Portfolio started. As the chart shows, by September 30, 2006, the value of the investment would have been \$11,820 — a 18.20% increase on the initial investment. For comparison, look at how the UNIQUE Conservative Portfolio Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$11,705 — a 17.05% increase.

### **Understanding Performance**

#### **Performance**

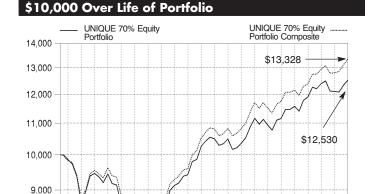

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

<b>Cumulative Total Returns</b>			
Periods ended September 30, 2006	Past 1 year	Past 5 years	Life of Portfolio

Dow Jones Wilshire 5000 Composite	10.38%	8.63%	4.19%						

**Average annual total returns** take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

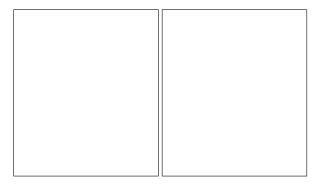

**Life of Portfolio:** Let's say hypothetically that \$10,000 was invested in UNIQUE 100% Equity Portfolio on May 7, 2001, when the Portfolio started. As the chart shows, by September 30, 2006, the value of the investment would have been \$11,880 — an 18.80% increase on the initial investment. For comparison, look at how the UNIQUE 100% Equity Portfolio Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10.000 would have been \$12.919 — a 29.19% increase.

### **Understanding Performance**

### Fund Talk: The Managers' Overview

Christopher Sharpe (left) and Jonathan Shelon, Co-Portfolio Managers of the UNIQUE Plan

### Q. How did the UNIQUE Plan Portfolios perform during the past year, Chris?

**C.S.** For the 12 months ending September 30, 2006, the UNIQUE College Investing Plan's age-based Portfolios generally performed in line with what we'd expect to see given our investment structure, which is to say that the Portfolios' absolute returns each reflected their different age-appropriate, asset-allocation risk levels. On a relative basis, all of the Portfolios lagged their composite benchmarks by modest margins. (For specific portfolio performance results on the age-based Portfolios and the static allocation Portfolios available in the UNIQUE Plan, please see the performance sections of this report.)

### Q. Jonathan, what factors influenced the Portfolios' results during the past 12 months?

**J.S.** It was a volatile period. We began last fall with growing inflationary fears on the heels of Hurricanes Katrina and Rita, which shot energy prices sharply higher. A warmer-than-usual winter heating season helped rein in rising energy costs, but investors' continued to look to the Federal Reserve Board for a sense of where the economy was headed. Until the spring of 2006, emerging-markets' debt and equity issues had been the hottest areas of the global marketplace. Then, in mid-May, there was a sharp correction as investors lost confidence in the ability of these markets to continue delivering the same kind of performance they'd demonstrated up to that point. In a sense, it was a matter of too much liquidity chasing expectations that were no longer realistic given a slowing macroeconomic environment. This correction was fairly typical of what often happens at the end of a bull cycle marked by a good deal of speculative investment, as there had been in the emerging markets and in other hot sectors of the global economy. So, in a manner of speaking, the correction was the market's way of penalizing investors for taking too much risk. Following the spring correction, however, the markets began to stabilize and, later in the period, to rebound. The effect of this volatility, particularly in equities, was that the Portfolios' equity allocations — both domestic and international — did not perform quite as well on an absolute basis as they had in the recent past. Meanwhile, the Portfolios' fixed-income asset allocations, which had shown generally lackluster performance as the Fed was hiking short-term interest rates, began producing a little better performance after the central bank chose in August to pause in its rate-tightening campaign.

### **Q.** Chris, how did the Portfolios' underlying equity funds perform relative to their benchmarks?

**C.S.** As an asset class, the Portfolios' domestic equities delivered solid returns during the past 12 months, but came up a bit short of the more healthy 10.38% gain of the benchmark Dow Jones Wilshire 5000 Composite Index<sup>SM</sup>. Only three of the nine underlying domestic equity funds beat this benchmark. The best results came from larger-cap, value-oriented funds, such as Fidelity® Equity-Income Fund and Fidelity Dividend Growth Fund, and the worst from the underlying small-cap fund, Fidelity Small Cap Independence Fund, as many investors reacted to the mid-year correction with a flight to higher-quality names. The Portfolios' two underlying international equity funds — Fidelity Overseas Fund and Fidelity Diversified International Fund — fared a little better on an absolute basis, turning in double-digit gains, but both still lagged slightly behind the benchmark Morgan Stanley Capital International<sup>SM</sup> Europe, Australasia, Far East (MSCI® EAFE®) Index, which returned 19.34%.

### Q. How did the fixed-income asset classes perform during the past year?

**C.S.** Like equities, the bond markets, too, were affected by volatility, starting off the period weakly and rallying toward the end. The Portfolios' investment-grade bond allocation slightly outpaced the 3.55% return of the Lehman Brothers® Intermediate Government/Credit Bond Index, led by the strong performance of the Fidelity Investment Grade Bond Fund. The short-term asset class slightly lagged the Lehman Brothers 3 Month U.S. Treasury Bill Index, which advanced 4.52%. Meanwhile, the high-yield bond class continued to deliver strong absolute performance, with its overall return exceeding the 7.22% advance of the benchmark Merrill Lynch® U.S. High Yield Master II Constrained Index. Both underlying funds — Fidelity Capital & Income Fund and Fidelity High Income Fund — outperformed the high-yield benchmark.

### Q. Back to you, Jonathan. What factors could affect the Portfolios' results in the near term?

**J.S.** While it's impossible to predict the future, we can reflect on the current state of the investment environment, and here's what we're seeing. Global markets have started to recover from the sharp mid-year correction, and a leadership rotation now seems to be taking place as a result. Some of the previous leaders — including small- and mid-cap stocks and those in certain industry segments — have not been as healthy as they'd been before. It seems apparent that investors are more cognizant that there are some quality issues they should take into account when investing, which leads us to believe that quality may be on the comeback. This is the kind of still-uncertain environment in which Fidelity's investment management approach typically adds a lot of value, because our fundamental research process tends to drive us toward quality names, with quality earnings growth and quality cash flows. But, as we've reminded shareholders in the past, there really is nothing we can do to control the various macro- and microeconomic forces that drive the investment environment. What we can do is to try to control risk by applying a long-term diversification structure that is designed, over time. to help investors successfully weather the market swings that inevitably will occur.

#### Fund Talk: The Managers' Overview - continued

Note to shareholders: The benchmark for the UNIQUE Plan's underlying high-yield bond funds changed to the Merrill Lynch U.S. High Yield Master II Constrained Index, effective March 31, 2006, concurrent with the scheduled rebalancing of the Funds' composite indexes. In Fidelity's view, the Constrained index — which replaces the Merrill Lynch U.S. High Yield Master II Index — represents a better measure of the high-yield market, as it limits issuer allocations to no more than 2% of the index and thus is more diversified than the previous benchmark and less likely to be disrupted by temporary market changes.

#### **Portfolio Facts**

Goal: All of the age-based Portfolios seek capital appreciation with reasonable safety of principal, consistent with the ages of the beneficiaries for whom they are designed. There are three static allocation Portfolios. The investment objective of the Conservative Portfolio is preservation of capital by allocating its assets among bond and money market funds. Income is a secondary objective. The investment objective of 70% Equity Portfolio is to maximize total return over the long term by allocating assets among stock and bond mutual funds. The investment objective of 100% Equity Portfolio is growth of capital over the long term.

**Start dates:** July 1, 1998; except 2024, which started on December 27, 2004; 2018, which started on January 4, 1999; 70% Equity Portfolio, which started on May 10, 2001; 100% Equity Portfolio, which started on May 7, 2001; and 2021 Portfolio and Conservative Portfolio, both of which started on December 13, 2001

**Size:** as of September 30, 2006, more than \$130 million (College); \$360 million (2006); \$586 million (2009); \$637 million (2012); \$697 million (2015); \$684 million (2018); \$398 million (2021); \$62 million (2024); \$73 million (Conservative); \$205 million (70% Equity); \$385 million (100% Equity)

Managers: Christopher Sharpe, since August 2005; co-portfolio manager, VIP Freedom Funds, since April 2005; Fidelity Arizona College Savings Plan, since June 2005; Delaware and Massachusetts College Savings Plans, since August 2005; joined Fidelity in 2002; Jonathan Shelon, since August 2005; co-portfolio manager, Fidelity Freedom Funds, since March 2005; Fidelity Arizona College Savings Plan, since June 2005; Delaware and Massachusetts College Savings Plans, since August 2005; Fidelity Advisor Freedom Funds, since 2003; joined Fidelity in 2001

#### The Co-Managers talk about college costs:

**Christopher Sharpe:** "Some parents may have read recently about The College Board survey announcing that the average price of tuition and fees at public four-year colleges this fall went up a little over 6%, the lowest level of increase in six years. On its surface, this may sound like good news, but, given a closer look, the news really isn't all that encouraging. Over the past five years, the price tag has risen a total of 35%. And more discouraging, this fall the financial aid packages available to students were not as generous as they've been in the past. The net result: Accounting for reductions in grant aid, it actually cost 8% more to send a son or daughter to a public college this fall than it did last year."

**Jonathan Shelon:** "If there's a bright spot in all this, I think it's that one of the provisions of the new Pension Protection Act of 2006 was to make all the tax benefits of 529 college savings plans permanent. College is an expensive proposition — we all know that — but there's clearly more to consider than just the cost inflation in tuition and fees."

### **Expected Asset and Benchmark Allocations**

Projected Target Mix											
	College	2006	2009	2012	2015	2018	2021	2024	Conservative	70% Equity	100% Equity
Domestic Equity Funds	20.00%	22.94%	29.91%	38.54%	49.28%	60.60%	69.86%	74.66%	_	60.00%	85.00%

Annualized
For the period December 13, 2001 (commencement of operations) to September 30, 2002.
Total returns for periods of less than one year are not annualized.
Calculated based on average units outstanding during the period.

#### **Notes to Financial Statements**

For the year ended September 30, 2006

#### 1. Significant Accounting Policies

The New Hampshire Higher Education Savings Plan Trust (the "Trust") was formed to establish and maintain a qualified tuition program — the UNIQUE College Investing Plan (the "Plan") — under section 529 of the Internal Revenue Code of 1986, as amended. The Treasurer of the State of New Hampshire (State of New Hampshire) is the Trustee of the Trust. These financial statements report on: UNIQUE College Portfolio, UNIQUE Portfolio 2006, UNIQUE Portfolio 2012, UNIQUE Portfolio 2015, UNIQUE Portfolio 2018, UNIQUE Portfolio 2021, UNIQUE Portfolio 2024, UNIQUE Conservative Portfolio, UNIQUE 70% Equity Portfolio, and UNIQUE 100% Equity Portfolio (collectively the "Portfolios"). The Portfolios invest primarily in a combination of other Fidelity equity, fixed-income, and money market funds, collectively referred to as the Underlying Funds, managed by Fidelity Management & Research Company (FMR). The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America which require management to make certain estimates and assumptions at the date of the financial statements.

The following summarizes the significant accounting policies of the Portfolios:

**Security Valuation.** Net asset per value per unit is calculated as of the close of business of the New York Stock Exchange, normally 4:00 p.m. Eastern time. Investments in the Underlying Funds are valued at their net asset value each business day.

**Investment Transactions and Income.** Security transactions, normally shares of the Underlying Funds, are accounted for as of trade date. Gains and losses on securities sold are determined on the basis of average cost. Income and capital gain distributions from the Underlying Funds, if any, are recorded on the ex-dividend date.

**Expenses.** Expenses are recorded on the accrual basis. Expenses included in the accompanying financial statements reflect the expenses of each Portfolio and do not include any expenses associated with the Underlying Funds.

**Units.** The beneficial interest of each participant in the net assets of the Portfolios are represented by units. Contributions to and redemptions from the Portfolios are subject to terms and limitations defined in the Participation Agreement between the participant and the Trust. Contributions and redemptions are recorded upon receipt of participant's instructions in good order, based on the next determined net asset value per unit (unit value). Unit values for each Portfolio are determined daily. There are no distributions of net investment gains or net investment income to the Portfolios' participants or beneficiaries.

#### 2. Fees

The Trustee has entered into a Management and Administrative Services agreement with FMR Corp. (the parent company of the group of companies commonly known as Fidelity Investments), Strategic Advisers, Inc. (Strategic) and Fidelity Brokerage Services, LLC (together Fidelity) to provide administrative, record keeping, marketing, and investment management services to the Trust.

According to this agreement and a related investment advisory agreement with Strategic, an investment adviser registered under the Investment Advisers Act of 1940, Fidelity receives a fee computed daily at an annual rate of .15% of average net assets of the Portfolios. This fee is paid from a fee imposed by the Trustee equal to .30% annually of each Portfolio's average net assets. The remaining .15% is retained by the Trustee.

In addition, each UNIQUE College Investing Plan account was charged a \$20 annual fee, which is waived under certain circumstances. Any annual fees imposed by the Trustee are in turn paid to Fidelity. Annual fees charged during the year are included in Cost of units redeemed and fees on the Statements of Changes in Net Assets. For the year ended September 30, 2006, total annual fees charged for the Portfolios were \$1,511,386.

#### 3. Other

The Portfolios' organizational documents provide limited indemnification against liabilities. In the normal course of business, the Portfolios may also enter into contracts that provide general indemnifications. The Portfolios' maximum exposure under these arrangements is unknown as this would be dependent on future claims that may be made against the Portfolios. The risk of material loss from such claims is considered remote.

The Portfolios do not invest in the Underlying Funds for the purpose of exercising management or control; however, investments by the Portfolios within their principal investment strategies may represent a significant portion of the Underlying Fund's net assets. At the end of the period, no Portfolio held a significant portion of the outstanding shares of any Underlying Fund.

#### 4. Subsequent Events

As of November 6, 2006, the Plan added 15 new index portfolio options which include UNIQUE Index College Portfolio, UNIQUE Index Portfolio 2006, UNIQUE Index Portfolio 2009, UNIQUE Index Portfolio 2012, UNIQUE Index Portfolio 2015, UNIQUE Index Portfolio 2018, UNIQUE Index Portfolio 2021, UNIQUE Index Portfolio, UNIQUE Index Portfolio, UNIQUE Index Conservative Portfolio, UNIQUE International Index Portfolio, UNIQUE Spartan 500 Index Portfolio, and UNIQUE Total Market Index Portfolio.

As of November 16, 2006, the Plan eliminated the \$20 annual account fee.

## **Report of Independent Accountants**

To the Fiscal Committee of the General Court of the State of New Hampshire, the Trustee of the New Hampshire Higher Education Savings Plan Trust and the Participants of The UNIQUE College Investing Plan:

In our opinion, the accompanying statements of assets and liabilities, including the schedules of portfolio investments as of September 30, 2006, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of the New Hampshire Higher Education Savings Plan Trust: UNIQUE College Portfolio, UNIQUE Portfolio 2009, UNIQUE Portfolio 2012, UNIQUE Portfolio 2015, UNIQUE Portfolio 2018, UNIQUE Portfolio 2021, UNIQUE Portfolio 2021, UNIQUE Portfolio 2024, UNIQUE Conservative Portfolio, UNIQUE 70% Equity Portfolio, and UNIQUE 100% Equity Portfolio (collectively the "Portfolios") at September 30, 2006, and the results of each of their operations, the changes in each of their net assets and each of their financial highlights for the periods indicated, in conformity with accounting principles generally accepted in the United States of America. The financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Portfolios' management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with auditing standards generally accepted in the United States of America which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which include confirmation of securities at September 30, 2006, by correspondence with the transfer agent, provide a reasonable basis for our opinion.

PricewaterhouseCoopers LLP Boston, Massachusetts December 14, 2006

brought to you by the State of New Hampshire managed by Fidelity Investments
